

MOTORIZED CHANGE OVER SWITCH WITH M.O.R

MODEL: GL-100

MOTORIZED CHANGE OVER SWITCH GL-100

The GL-100 Motorized Changeover Switch (80A, 4 Pole) is a high-performance automatic source transfer device designed to provide fast, safe, and reliable switching between utility (mains) power and generator supply. Engineered for uninterrupted power continuity, it automatically transfers the electrical load during power outages and restores it to the utility source once normal power is available, ensuring continuous operation of critical electrical systems.

FEATURES

- ◆ High short circuit breaking capacity.
- ◆ Reliable motor operator mechanism.
- ◆ Built-in M.O.R (Manual Over Ride).
- ◆ Compact design for easy panel installation.
- ◆ Designed and tested in accordance with standards.
- ◆ Automatic transfer between utility and generator power.
- ◆ Mechanically & electrically interlocked.

SPECIFICATIONS

- | | |
|-----------------------------|------------------|
| ◆ Model | GL-100 |
| ◆ Rated current | 80A |
| ◆ Switching poles | 4 Pole |
| ◆ Network type | AC |
| ◆ Continuous voltage rating | 230/400v 50/60Hz |
| ◆ Voltage range | 127v to 250v |
| ◆ Temperature | -25 to +70°C |
